

ABDUL SHUAIB

+91 7892698624 — abdulshuaib08@gmail.com — LinkedIn — GitHub

Professional Summary

An undergraduate in AI-focused computer science with internship experience in Data Science and hands-on expertise in Machine Learning, Computer Vision, and Full-Stack Development. Experienced in building intelligent applications using Python, Flask, OpenCV, MediaPipe, Firebase, MySQL, and SQL, with a strong interest in developing scalable AI solutions for real-world problems.

Education

B.E. in Computer Science Engineering

2023 – 2027

Gopalan College of Engineering & Management, Bengaluru

Technical Skills

Programming: Python

Tools: Git, GitHub, VS Code

Experience

Data Scientist Intern — EVOASTRA

Feb 2026 – Mar 2026

- Worked on end-to-end Machine Learning workflows including data preprocessing, feature engineering, model training, evaluation, and performance optimization.
- Performed exploratory data analysis (EDA) to identify trends, patterns, and actionable insights from structured datasets.
- Developed predictive machine learning models using Python and optimized performance through feature engineering and hyperparameter tuning.
- Data sets cleaned, transformed, and validated to build reliable ML pipelines and improve data quality.
- Collaborated with mentors to solve business problems using data-driven solutions and analytical techniques.

Projects

T7SkillUp — AI-Powered Career Intelligence Platform

State-Level Hackathon Winning Project (Vibexathon 2026)

Tech Stack: Python, Flask, React.js, Firebase, Machine Learning, NLP, SQL, Chrome Extension

- Developed an AI-powered career intelligence platform that evaluates resumes, learning progress, and industry job descriptions to generate a Career Readiness Quotient (CRQ) and personalized skill roadmap.
- Built a distraction-free Chrome extension, real-time skill tracking module, and institutional analytics dashboard to improve student employability.
- Integrated Machine Learning techniques to recommend personalized learning paths based on individual skill gaps and career goals.
- **GitHub:** [View Repository](#)

IPL Intelligence Platform

Cricket Analytics and Prediction System

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Streamlit, SQL

- Developed a data-driven cricket analytics platform to analyze IPL player and team performance using historical datasets.
- Performed data preprocessing, exploratory data analysis (EDA), feature engineering, and visualization to generate actionable insights.
- Built interactive dashboards for batting, bowling, and team performance statistics with predictive analytics.
- Implemented machine learning models for player performance evaluation and match outcome prediction.
- **GitHub:** [View Repository](#)

Hackathon Achievements

GCEM Hackathon — Runner-Up

Project: ASHA Karyakartha Support and Monitoring System

- Digitized rural healthcare tracking workflows for ASHA workers.
- Reduced manual reporting effort through automated data collection and reporting.
- Implemented secure authentication and real-time backend synchronization using Firebase.

NEXATHON'25 — Runner-Up

Project: Real-Time Classroom Engagement Analysis System

- Developed an AI-powered classroom engagement monitoring system that analyzes student attention in real time using Computer Vision.
- Implemented face, eye, head-pose, hand-raise, and drowsiness detection using OpenCV and MediaPipe to generate engagement scores.

Vibexathon 2026 — Runner-Up

Project: T7SkillUp – AI-Powered Career Intelligence Platform

- Developed **T7SkillUp**, an AI-powered career intelligence platform.
- Built an intelligent system that analyzes resumes, learning progress, and industry job descriptions to generate a **Career Readiness Quotient (CRQ)** and personalized skill roadmap.
- Developed features including a distraction-free Chrome extension, real-time skill tracking, and institutional analytics dashboards to enhance student employability.
